

Table 2: Funding for Global Change Research under the CCSP and USGCRP,

Fiscal Years 1989 - 2008 (millions of dollars)

[Note: This table was updated May 2007]

Past, present and future budget data are key components of the information transmitted to Congress in *Our Changing Planet*. This table shows the evolution of funding for the program since 1989. Note that the scope of activities included within the budget is not constant over the period. In some cases (as in 1989-1990), a substantial portion of the year-to-year budget change results from shifting activities into or out of the program. These changes in program definition are the result of changing scientific priorities and other factors. [Additional information on program budgets](#) is available.
